Take action with Microban 
disinfectants

Be proactive before microbes have a chance to spread. Clean and disinfect hard, non-porous surfaces – especially hand contact surfaces – with Microban Germicidal Cleaner Concentrate to help reduce exposure to the H1N1 Swine Flu virus, other influenza Type A virus strains and MRSA.

Clean with confidence

Don’t take chances on products not proven to be effective. According to the Federal Centers for Disease Control and Prevention (CDC), swine flu is caused by an influenza Type A virus H1N1. While viruses of this type mutate rapidly, the EPA believes that products currently effective against influenza Type A virus strains, will be effective against the 2009-H1N1 flu strain and other influenza Type A virus strains.

With all that’s at stake, choose products that are trusted by thousands of professionals.

Microban Germicidal Cleaner Concentrate is EPA registered (Registration #70385-6) and effective against the Type A influenza virus.
